

SAFETY DATA SHEET

New Zealand HSNO Compliant

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

1.1 Product identifier

Product name RAMSET BLAZEBRAKE 201 FIRE RATED ACRYLIC SEALANT

Synonyms BLAZE BRAKE (FORMERLY) ● BLAZE BRAKE 201 FIRE RATED ACRYLIC SEALANT ● BLAZEBRAKE 201

(FORMERLY) • BLBRGYC, BLBRGYS - PRODUCT CODE(S)

1.2 Uses and uses advised against

Uses FIRE RETARDANT ● JOINING COMPOUND ● SEALANT

1.3 Details of the supplier of the product

Supplier name RAMSETREID NZ (A DIVISION OF ITW NEW ZEALAND)

Address 23-29 Poland Road, Glenfield, Auckland, 0627, NEW ZEALAND

 Telephone
 0800 88 22 12

 Email
 info@ramset.co.nz

 Website
 http://www.ramset.co.nz

1.4 Emergency telephone numbers
Emergency 0800 734 607

2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

HAZARDOUS ACCORDING TO NZ ENVIRONMENTAL PROTECTION AUTHORITY CRITERIA

Physical Hazards

Not classified as a Physical Hazard

Health Hazards

Acute Toxicity: Inhalation: Category 4 Acute Toxicity: Oral: Category 4

Specific Target Organ Toxicity (Repeated Exposure): Category 2

Toxic to Reproduction: Category 1

Environmental Hazards

Aquatic Toxicity (Chronic): Category 2

2.2 GHS Label elements

Signal word DANGER

Pictograms

Page 1 of 7

Hazard statements

H302 Harmful if swallowed. H332 Harmful if inhaled.

H360 May damage fertility or the unborn child.

H373 May cause damage to organs through prolonged or repeated exposure.

H411 Toxic to aquatic life with long lasting effects.

SDS Date: 05 Aug 2024

Revision No: 1.1

PRODUCT NAME RAMSET BLAZEBRAKE 201 FIRE RATED ACRYLIC SEALANT

Prevention statements

P102 Keep out of reach of children.

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash thoroughly after handling.

P270 Do not eat, drink or smoke when using this product.
P271 Use only outdoors or in a well-ventilated area.

P273 Avoid release to the environment.

P281 Use personal protective equipment as required.

Response statements

P101 If medical advice is needed, have product container or label at hand.

P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P308 + P313 IF exposed or concerned: Get medical advice/ attention.

P330 Rinse mouth.

P331 Do NOT induce vomiting.

P391 Collect spillage.

Storage statements

P405 Store locked up.

Disposal statements

P501 Dispose of contents/container in accordance with relevant regulations.

2.3 Other hazards

No information provided.

3. COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances / Mixtures

Ingredient	CAS Number	EC Number	Content (w/w)
FRITS, CHEMICALS	65997-18-4	266-047-6	<10%
NON HAZARDOUS INGREDIENTS	Not Available	Not Available	Remainder
ADDITIVE(S)	-	-	<1%

4. FIRST AID MEASURES

4.1 Description of first aid measures

Eye If in eyes, hold eyelids apart and flush continuously with running water. Continue flushing until advised to

stop by a Poisons Information Centre, a doctor, or for at least 15 minutes.

Inhalation If inhaled, remove from contaminated area. To protect rescuer, use an Air-line respirator where an inhalation

risk exists. Apply artificial respiration if not breathing.

Skin If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water.

Continue flushing with water until advised to stop by a Poisons Information Centre or a doctor.

Ingestion For advice, contact the National Poisons Centre on 0800 764 766 (0800 POISON) or +643 479 7248 or a

doctor (at once). If swallowed, do not induce vomiting. Rinse mouth out with water and give plenty of water to

drink.

4.2 Most important symptoms and effects, both acute and delayed

Lead is a cumulative poison and may cause kidney, central nervous system and blood damage with repeated exposure.

4.3 Immediate medical attention and special treatment needed

Treat symptomatically.

5. FIRE FIGHTING MEASURES

5.1 Extinguishing media

Use an extinguishing agent suitable for the surrounding fire.

SDS Date: 05 Aug 2024 Revision No: 1.1

PRODUCT NAME RAMSET BLAZEBRAKE 201 FIRE RATED ACRYLIC SEALANT

5.2 Special hazards arising from the substance or mixture

Non flammable. May evolve toxic gases (carbon oxides, lead oxides) when heated to decomposition.

5.3 Advice for firefighters

Evacuate area and contact emergency services. Toxic gases may be evolved in a fire situation. Remain upwind and notify those downwind of hazard. Wear full protective equipment including Self Contained Breathing Apparatus (SCBA) when combating fire. Use waterfog to cool intact containers and nearby storage areas.

5.4 Hazchem code

•3Z

- Alcohol Resistant Foam is the preferred firefighting medium but, if it is not available, normal foam can be used. •3
- 7 Wear full fire kit and breathing apparatus. Contain spill and run-off.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Wear Personal Protective Equipment (PPE) as detailed in section 8 of the SDS. Clear area of all unprotected personnel. Contact emergency services where appropriate.

6.2 Environmental precautions

Prevent product from entering drains and waterways.

6.3 Methods of cleaning up

Contain spillage, then cover / absorb spill with moist sand or similar, collect and place in sealable containers for re-use, treatment and/or disposal.

6.4 Reference to other sections

See Sections 8 and 13 for exposure controls and disposal.

7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Before use carefully read the product label. Use of safe work practices are recommended to avoid eve or skin contact and inhalation. Observe good personal hygiene, including washing hands before eating. Prohibit eating, drinking and smoking in contaminated areas.

7.2 Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well ventilated area, removed from incompatible substances and foodstuffs. Ensure containers are adequately labelled, protected from physical damage and sealed when not in use.

7.3 Specific end uses

No information provided.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Control parameters

Exposure standards

No exposure standards have been entered for this product.

Biological limits

No biological limit values have been entered for this product.

8.2 Exposure controls

Engineering controls

Avoid inhalation. Use in well ventilated areas. Where an inhalation risk exists, mechanical extraction ventilation is recommended.

ChemAlert. Page 3 of 7 Revision No: 1.1

PRODUCT NAME RAMSET BLAZEBRAKE 201 FIRE RATED ACRYLIC SEALANT

PPE

Eye / Face Wear a faceshield and splash-proof goggles.

Hands Wear PVC or rubber gloves.

Body Wear coveralls.

Respiratory Where an inhalation risk exists, wear Self Contained Breathing Apparatus (SCBA) or an Air-line / Full

Facepiece Supplied-Air Respirator (SAR). If cutting or sanding with potential for dust generation, wear a

Class P3 (particulate) / N100 respirator.

9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Appearance OFF-WHITE OR GREY PASTE CHARACTERISTIC ODOUR

NON FLAMMABLE **Flammability NOT RELEVANT** Flash point **NOT AVAILABLE Boiling point NOT AVAILABLE Melting point NOT AVAILABLE Evaporation rate** На **NOT AVAILABLE NOT AVAILABLE** Vapour density 1.30 to 2.00 Relative density **SOLUBLE**

Solubility (water) NOT AVAILABLE Vapour pressure NOT RELEVANT Upper explosion limit NOT RELEVANT Lower explosion limit **NOT AVAILABLE** Partition coefficient **NOT AVAILABLE** Autoignition temperature **NOT AVAILABLE Decomposition temperature NOT AVAILABLE** Viscosity NOT AVAILABLE **Explosive properties NOT AVAILABLE** Oxidising properties **NOT AVAILABLE** Odour threshold

9.2 Other information

% Volatiles 25 % to 30 % VOC < 0.1 %

10. STABILITY AND REACTIVITY

10.1 Reactivity

Carefully review all information provided in sections 10.2 to 10.6.

10.2 Chemical stability

Stable under recommended conditions of storage.

10.3 Possibility of hazardous reactions

Polymerization is not expected to occur.

10.4 Conditions to avoid

Avoid heat, sparks, open flames and other ignition sources.

10.5 Incompatible materials

Incompatible with oxidising agents (e.g. hypochlorites) and acids (e.g. nitric acid).

10.6 Hazardous decomposition products

May evolve toxic gases (carbon oxides, lead oxides) when heated to decomposition.

ChemAlert.

SDS Date: 05 Aug 2024 Revision No: 1.1

Page 4 of 7

11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Acute toxicity Harmful if swallowed or if inhaled. Typical acute clinical manifestations of lead poisoning include weakness,

irritability, asthenia, nausea, abdominal pain with constipation, and anaemia.

Skin Contact may result in irritation, rash and dermatitis.

Eye Contact may result in irritation, lacrimation, pain and redness.

Sensitisation Insufficient data for classification as a skin or respiratory sensitiser.

Mutagenicity The evidence for genotoxic effects of lead is contradictory, with numerous studies reporting both positive and

negative effects. Responses appear to be induced by indirect mechanisms, mostly at very high

concentrations that lack physiological relevance.

Carcinogenicity Lead compounds (inorganic) are classified as probably carcinogenic to humans (IARC Group 2A). **Reproductive** There is sufficient data to indicate that lead compounds may damage fertility or the unborn child.

STOT - single exposure

Over exposure to lead may result in severe headache, breathing difficulties, abdominal muscle pain,

irritability, nausea and constipation.

STOT - repeated exposure

Lead is a cumulative poison and may be absorbed into the body through ingestion or inhalation. Lead has been documented in observational human studies to produce toxicity in multiple organ systems and body

function including the haematopoietic (blood) system, kidney function, reproductive function and the central

nervous system.

Aspiration Not classified as causing aspiration.

12. ECOLOGICAL INFORMATION

12.1 Toxicity

Toxic to aquatic life with long lasting effects. Toxicity will depend on the level of free lead ion in solution, which in turn is affected by pH, water hardness, salinity, etc. Lead toxicity is expected to be greater in softer waters.

12.2 Persistence and degradability

Inorganic lead does not degrade.

12.3 Bioaccumulative potential

Lead bioconcentrates and bioaccumulates in both aquatic and terrestrial organisms.

12.4 Mobility in soil

Lead can persist in soil for a long period of time by forming low-solubility compounds with salt ions (e.g. sulphate, oxide, sulphide, and phosphates); or by adsorbing to organic matter, clay, and minerals; or by forming fairly stable complexes with organic and inorganic materials. Soil pH, organic matter content, soil type, cation exchange capacity, and metal concentrations all influence leads' mobility in soil. Lead compounds and complexes become more soluble (mobile) in acidic soil solutions or in the presence of reduced organic matter.

12.5 Other adverse effects

Avoid contamination of drains and waterways.

13. DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Waste disposal Environmental pollutant. Convert small quantities to insoluble sulphide. Convert to nitrates with a minimum of

nitric acid. Evaporate in a fume cupboard to a thin paste and saturate with hydrogen sulphide. Filter precipitate and dispose of to hazardous waste landfill. Destroy excess sulphide with sodium hypochlorite. Neutralise solution before flushing to sewer. Contact the manufacturer/supplier for additional information (if

required).

Legislation Dispose of in accordance with relevant local legislation.

14. TRANSPORT INFORMATION

CLASSIFIED AS A DANGEROUS GOOD ACCORDING TO LAND TRANSPORT RULE: DANGEROUS GOODS 2005; NZS 5433:2012, UN, IMDG OR IATA

ChemAlert.

SDS Date: 05 Aug 2024 Revision No: 1.1

	LAND TRANSPORT (NZS 5433)	SEA TRANSPORT (IMDG / IMO)	AIR TRANSPORT (IATA / ICAO)

14.3 Transport hazard class	9	9	9
14.4 Packing Group	III	III	III

14.5 Environmental hazards

Marine Pollutant.

14.6 Special precautions for user

Hazchem code ●3Z EmS F-A, S-F

Other information

The environmentally hazardous substance mark is not required when transported in packages of less than 5 kg/L (UN Model Regulations: Special Provision 375; IATA: Special Provision A197; IMDG:

Special Provision 969).

15. REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Approval code HSR002544 (2020)

Group standard Construction Products (Subsidiary Hazard) Group Standard 2020

Inventory listings AUSTRALIA: AllC (Australian Inventory of Industrial Chemicals)

All components are listed on AIIC, or are exempt.

NEW ZEALAND: NZIoC (New Zealand Inventory of Chemicals) All components are listed on the NZIoC inventory, or are exempt.

16. OTHER INFORMATION

Additional information

LEAD: Lead compounds are concentrated in the food chain. Biological half-life for inorganic lead in human bones: 10 yrs. Lake sediment microorganisms are able to directly methylate certain inorganic compounds. Under specific conditions, dissolution due to anaerobic microbial action may be significant in subsurface environments. Aquatic plants and animals have been shown to bioconcentrate lead at levels greater than in water, and sometimes similar to those in sediments. Lead levels decrease with increasing trophic (nourishment) levels within aquatic systems.

RESPIRATORS: In general the use of respirators should be limited and engineering controls employed to avoid exposure. If respiratory equipment must be worn ensure correct respirator selection and training is undertaken. Remember that some respirators may be extremely uncomfortable when used for long periods. The use of air powered or air supplied respirators should be considered where prolonged or repeated use is necessary.

IARC GROUP 2A - PROBABLE HUMAN CARCINOGEN. This product contains an ingredient which has been classified by the International Agency for Research into Cancer (IARC) as a probable human carcinogen and whose use should be strictly monitored and controlled.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES:

The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as form of product, method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

Page 6 of 7 SDS Date: 05 Aug 2024
Revision No: 1.1

PRODUCT NAME RAMSET BLAZEBRAKE 201 FIRE RATED ACRYLIC SEALANT

HEALTH EFFECTS FROM EXPOSURE:

It should be noted that the effects from exposure to this product will depend on several factors including: form of product; frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a report which would encompass all possible scenarios, it is anticipated that users will assess the risks and apply control methods where appropriate.

Report status

This document has been compiled by RMT on behalf of the manufacturer, importer or supplier of the product and serves as their Safety Data Sheet ('SDS').

It is based on information concerning the product which has been provided to RMT by the manufacturer, importer or supplier or obtained from third party sources and is believed to represent the current state of knowledge as to the appropriate safety and handling precautions for the product at the time of issue. Further clarification regarding any aspect of the product should be obtained directly from the manufacturer, importer or supplier.

While RMT has taken all due care to include accurate and up-to-date information in this SDS, it does not provide any warranty as to accuracy or completeness. As far as lawfully possible, RMT accepts no liability for any loss, injury or damage (including consequential loss) which may be suffered or incurred by any person as a consequence of their reliance on the information contained in this SDS.
