

Description

For fast installation of partitioning and track, use the Ramset™ TrakFast™ gas tool to provide high volume repetitive fixing into a range of building materials.

Specifications

Weight	3.8kg
Height	450mm
Length	380mm
Magazine Capacity	40 (+2) pin magazine
Impact Force	77J
Actuation Pressure	5kg
Intermittent Operation	2 pins per second
Fuel Cell Life	1,100 pins (approx)
Battery Charge Capacity	3,000 pins (approx)
Battery Voltage	6V
Battery Amperage	600mA
Battery Charge time	2.5 hours
Power Regulation	Automatic
Operating Temperature Range	-5°C to 49°C

Substrates

Concrete, Composite Steel Decking, Solid Brick, Precast Concrete, Steel Pre-stressed Concrete, Hollow Block Wall, Reinforced Concrete, Reinforced Prefabricated Concrete

Features & Benefits

- Increased durability and reliability
- Off position to prevent draining the battery when tool is not in use
- Cordless - self powered, no set up time required
- Sequential actuation - safe operation
- Tool automatically resets piston
- Narrow nose and profile to reach inside deep leg track
- Soft cushioned grip
- Carrying case
- Well balanced
- Mechanical fuel injection
- Low maintenance

Trades & Applications

	Ceiling & Partitioning Contractor
Track to concrete	✓
Track to steel	✓

Standard Operating Procedure

Always read and understand the instruction manual before attempting to operate a Ramset™ Gas Technology Tool.

1. First insert the fuel cell and battery into the tool.
2. Insert the collated fasteners into the magazine.
3. The tool should then be compressed against the work surface. (Making sure that the tool is perpendicular to the work surface).
4. Once the tool is compressed the trigger can be actuated and the fastener is driven through the material being fastened and into the substrate.

TrakFast™

Part No	Description	Order Qty
TF1200	TrakFast™ Tool + 2 batteries	1

Kit includes: TrakFast™ Tool, high impact carry case, 2 x batteries, battery charger, safety glasses and instruction manual
