

CemCrete™

Construction Chemicals and Accessories

Product Identifier CMCRL5, CMCRL20

Product description

CemCrete™ is a high molecular weight polymer concentrate, which when diluted and added to cement mixtures reduce cracking and improve adhesion.

Relevant building code clauses

F2 Hazardous building materials - F2.3.1

Contributions to compliance

For F2 Hazardous building materials refer to the CemCrete™ SDS (Safety Data Sheet) listed in supporting documentation.

Scope of use

CemCrete™ is a high molecular weight polymer concentrate, which when diluted and added to cement mixtures reduce cracking and improve adhesion. CemCrete™ also aids bonding of concrete, renders, mortars and toppings to existing concrete, block and brick. It is ideal for priming porous surfaces for ceramic tiling, and to add flexibility to cement tile grouts and adhesives.

Features and benefits:

- Improves strength and toughness of cement mixtures
- Improves adhesion of cement mixtures to existing concrete, brick and block
- Strong bond
- User friendly – clean up with water & low odour

Conditions of use

CemCrete™ should only be used by a skilled professional within the parameters set out on the Ramset™ webpage.

Supporting documentation The following additional documentation supports the above statements:

Appendix - Building code performance clauses

All relevant building code performance clauses listed in this document:

F2 Hazardous building materials

F2.3.1

The quantities of gas, liquid, radiation or solid particles emitted by materials used in the construction of buildings, shall not give rise to harmful concentrations at the surface of the material where the material is exposed, or in the atmosphere of any space.
