

AnkaScrew™ Tapcon Xtrem™ 6 x 43mm

Heavy Duty Seismic Anchoring

Anti-Rotation Grooves
To limit overtightning

Torx Recess
For hard to reach areas

ETA Certified
For seismic applications

High resistance

Two sharp notches

For easier engagement of the thread

Xtrem™ Performance
Seismic C1 rated

A seismic certified heavy duty screw-in anchor

ETA seismic certified heavy duty screw-in anchor, certified for fire exposure & seismic C1 applications.

Easy to install and remove where required.

Compliance

European Technical Assessment (option1) – ETA 24/0954

Design According to:

- ✓ AS5216 (formerly TS101)
- ✓ AS1170.4 – Earthquake Actions
- ✓ EN1992-4 (formerly ETAG 001 Annex C, E & TR045)
- ✓ NZ3101 (A3) Section 17 – Seismic Design C1

Advantages

Fast and easy to install:

Simply screws into hole.

Fast and easy to remove:

Screws out leaving an empty hole with no protruding metal parts to grind off.

Close to edge and for close anchor spacing:

Does not expand and burst brick and block.
